Project Proposal: Bayesian Estimation

Stella Rovazzi · Ramez Elprince · Brenden Doogan

University of Guelph

Project Overview

Objectives

- bleh Ripley and Venables (2009)

Background and Literature

Proposed Computational Strategy

Simple Example

Goal

We will start with a simple example to ensure we can correctly converge to some posterior. Alongside this, we will ensure we can calculate (and infer) posterior summary statistics, suitability of the model, monte-carlo standard error, and rate of convergence.

Methodology

Division of Responsibility

Timeline

We can chat about GANTT charts on tuesday or smth, just so we can layout realistic dates with buffer room.

Expected Outcomes

bleh
